

Sustainable Portland Story:

To be SUSTAINABLE, Portland must grow and change; it must provide a welcoming environment for diverse people, industries, neighborhoods, buildings and institutions. It needs to approach new challenges with new ideas.

PSA held a provocative meeting on Sea Level Rise, spurring City officials to analyze the threat and participate in an ensuing two-day public symposium that addressed potential adaptations to rising water. PSA is co-hosting a conference on growth and change : Are We Loving Portland to Death?
